

Spotkanie miłośników endodoncji

# **PULP FICTION** **GLOBAL ENDO - EFAM**

**International Congress Pulp Fiction Global Endo - EFAM**  
**Endodontic's Enthusiasts Meeting on 8th - 11th of December 2011.**

The annual Meeting of Endodontics' Enthusiasts **Pulp Fiction in 2011** will have a Special Edition!  
This year the International Congress Pulp Fiction presents a unique event, a joint Meeting of the **Penn Global Endo Symposium**, supported by The **University of Pennsylvania** and of the **European Federation Association Microdentistry** (EFAM) together with the The **Polish Endodontic Society**.

We cordially invite You to participate in the Pulp Fiction Global Endo - EFAM Congress where world class speakers will present Topics on Endodontics and Micro-Dentistry, clearing details and discussing controversial aspects on different subject matters.

The Congress will be held from 8th to 11th December 2011 in "**The Best Western Premier**" Hotel in Cracow. Variety of interesting lectures and practical workshops will surely satisfy all the Participants and the accompanying social events will make the stay in Cracow even more attractive.

## **Penn Endo Session Program**

**DAY 1 (Thursday, 8th of December 2011) / 2 (Friday, 9th of December 2011)**

**Dr Denis Kinane** - Biofilm

**Dr Noah Chivian** - A fifty year retrospective look at the Evolution of Endodontic practice in the United States

**Dr Martin Trope** - Vital Pulp Therapy. What our knowledge from trauma teaches us in the treatment of the carious exposure - **Abstract**

**Dr Giberto Debelian** (Norway) - Endo

**Dr Spyros Floratos** (Greece) - Surgery

**Dr Sam Kratchman** - Surgery

**Dr Meetu Kohli** - Prognosis of Endodontic Retreatment : An evidence based approach - **Abstract**

**Dr Fred Barnett** - CBCT in Endodontics - **Abstract**

**Dr Christof Pertl** - Tooth or Titanium - Do the right thing!

**Dr Syngcuk Kim** - Surgery

## **EFAM - Scientific Program**

### **DAY 3 / Saturday, 10th of December 2011**

**Dr Arnaldo Castellucci / Florence (I)** - The use of the Operating Microscope in Complex Endodontic Retreatments - **Abstract**

**Prof. Giuseppe Cantatore / Rome (I)** - Advantages of the Operating Microscope in Treating Complex Root Perforations - **Abstract**

**Prof. P. Varela / Santiago de Compostela (E)** - Application of CBCT for the resolution of complex cases in endodontic treatment - **Abstract**

**Dr Helmut Walsh / Munich (D)** - Benefits of the Operating Microscope in Endodontics - **Abstract**

**Dr Jerzy Zbozeń / Kielce (PL)** - To see or not to see: one of the most important questions not only for Endodontics

**Dr Augusto Malentacca / Rome (I)** - Operative dentistry with microscope - **Abstract**

**Dr Gabriele Pecora / Rome (I)** - Surgery of the Maxillary Sinus under the Operating Microscope - **Abstract**

**Dr Francesco Maggiore / Aschaffenburg (D)** - Restoring Endodontically Treated Teeth under the Operating Microscope - **Abstract**

**Dr Julio Moran / Gijón (E)** - Making daily work easier - **Abstract**

**Dr Franco dal Pont / Treviso (I)** - The use of the Operating Microscope in Prosthodontics

### **DAY 4 / Sunday, 11th of December 2011**

**Dr Veronique Gestér / Bruxelles (B)** - Comfort in Microendodontics - **Abstract**

**Dr Lorenzo Daniele / l'Aquila (I)** - The use of the Operating Microscope in Implantology - **Abstract**

**Dr M. Bonelli, Dr T. Machan (I)** - The use of the Operating Microscope in managing Advanced Oral Surgical Cases - **Abstract**

We cordially invite!

## **European Federation Associations Microdentistry**

The European Federation Associations Microdentistry was founded in 2003 to represent the national Associations of Microdentistry from different European countries on the European level. The founding associations of the EFAM have been the Italian Academy of Microdentistry, the Francophonian Society of Microdentistry (France, Belgium) and the Spanish Association of Microdentistry. Through the years, also the Associations of Microdentistry from Germany and Poland did join the European Federation.

### **What is Microdentistry:**

Dentistry is the branch of the medical field concerning the prevention, diagnosis and therapy of oral and dental pathologies. In order to treat compromised teeth Dentists have to perform sophisticated procedures in the small environment of the oral cavity often dealing with fine and delicate anatomical structures. Conventional treatment performed without magnifying systems often presents limitations due to lack of adequate visibility and capability to identify and thus properly treat small critical details.

Dental Procedures performed under the high Magnification and Illumination provided by the Operating Microscope are treatments of the highest precision and represent the current state of Clinical Excellence in Dentistry. Literature and clinical evidence show that the outcome of microscope-assisted treatments is definitely superior compared to conventional treatments in many cases. The first dental specialties to adopt the Operating Microscope were those dealing with the treatment of finest details, like Endodontics.

Clinicians realized that the advantages of Magnification and Illumination are actually applicable to many different dental procedures, in Endodontics as well as in Restorative Dentistry, Esthetic Dentistry, Periodontics, Prosthodontics, Oral Surgery

and even Implantology. All these Microscopic procedures greatly differ from the conventional ones performed without magnification systems, thus the need to refer to the new term of Microdentistry.

Microdentistry Operators soon felt the need to share their clinical work, ideas and findings. This need is expressed by the constitution of Microdentistry Associations (i.e.: Italian Academy of Microdentistry, Francophonian Society of Microdentistry [France, Belgium], the Spanish Association of Microdentistry, Studiengruppe für Mikroskopie in der Zahnheilkunde [Germany]). The increasing use of the Operating Microscope in Clinical Practice did imply active sharing of information among Microscope users and settled the need for International Congresses. The EFAM organizes an International Congress in one of the Member-countries, regularly.

Dr. Francesco Maggiore

EFAM, Secretary
